

BPS®C6

Setting new benchmarks to move you ahead

02

Taking the lead through best-in-class performance

Speed, sorting, sensors, connectivity: all areas in which the BPS C6 is setting new standards in its segment. Discover this high-performance giant among desktop processing systems today

What the in such switch, communical banks, or cyclines, the BPS Cis provides that critical head start where medican to large facilitation and to be preconated in demandaling feeding dusty questions. The system has been applicable, blood-logical to facilitation and the second representations efficiency in hardwork processing, necknown configurations and second configurations and processing and control of the second configurations.

The new benchmark in the world of desistops

The BPS CB offers a nominal throughput of up to 72,000 bardonstes per hous, so phiotizated high-lovel sensor technology a medular concept with up to 12 output stackers, and an extremely rubust design all finitures that endole the BPS CE to support outliness when it comes to over coming current and future shallenges in benknote processing.

terrances processing. Wholeses to the network of afficiency. The RFS Cit is a high-performance, relaining, and charable systems that also features all the modern interfaces for embedding into interprotect modern obstacles. For example, system interaction becomes continue, software of them to the company of the performance of the continue of the con

High-speed banknote processing of up to 1,200 BN/min. in all modes: counting, authentication, fitness sorting, and serial number reading

06

Adaptable to individual requirements

The flexible concept of the BPS C6 means that you can choose the configuration based on individual requirements

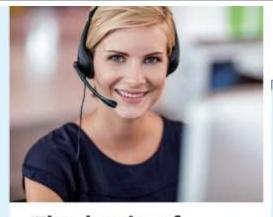

A range of processing and sorting tasks can be correlated outly serious that office between 4 and 12 output stackers.

The basic module pumprises one large feeder (up to 1,500 basishostes), 2 reject stackers (up to 250 basishostes) and 4 output stackers (up to 500 basishostes). For more efficient surfag, one reject stacker use to configured as an additional output stacker.

the typeens in this simple to upgrade to extra-carput stanton. Choose between 4 and 8 stuck or mobules to enlarge the 875

The flexible configuration options also include adjustable operation modes and Seld upgradability. The operator can chouse earlig tenteren satious proteoming options and a multituale of surrencies.

The basis of productivity is availability

With our needs-oriented consulting team and fully comprehensive service portfolio, Giesecke+Devrient's customers benefit from full productivity and smooth operation of systems – for the entire life of the products

G+D timesetting services: For solutions that are the perfect fit Our mounts around the included needs, noticing processes, special requirements, option environment, and more. Based on this analysis, we will recommend the right solution for your operation, and it will be integrated smoothly into your production processes.

G-D service; always at your side, whenever and wherever you need it Our dense, global service network ername the customer can rely on our support at all times. Your spalms are kept up for date with frequent updates and upgrades - which can further boost productivity.

G-D remote service; the fastiest solutions via remote access the GPU remote services to optimize up-time of year systems. A large proportion of spating properties, a large proportion of spating fastions can be investigately respected to and resoluted using their protections, our service specificality sidentification of the times and put it right in an invariant.

EPS ECO-SYSTEM: FUTURE-PROOF USE OF DIGITAL POTENTIAL

BPS ECO-SYSTEM is an immorative portfolio of highly secure networked software products and sets services that book the efficiency of cash management and banknote proposing

07

BYS ECO-PROTECT in an ordustry frewait that efficiently protects a SPS in a cuptomer's environment against must make were stacks, and another secure communication to and from the SPS.

BPS ECO-REMOTE promitins a highly beautin merclet management soft bon for BPS. It allows remarks exist terring, performance management, diagnostics, and over software updates to the growted through 64-0, or saling in-house or third-garty personed, withhout the book prospose of a service engineer.

COMPASS CASH CENTER is a comprehensive, process oriented cash center management addition, enabling all of your cash management processes to be automated, optimized, and reliably monitored.

The 8PS Cs can be madily integrated into existing IT structures. Ceah management solution auch as Gerpass Cash Centler ensure greater transparency, security, and productivity throughout the process

Compact size huge potential

The BPS C6 combines compact size with premium function. The system provides best-in-class sorting quality with performance that stands out in its market segment. The processing capabilities of the BPS C6 come at a speed of up to 1,200 banknotes per minute for all functions from authenticity checking, through fitness sorting, up to serial number reading and comparison. Striking performance in all areas: efficiency, flexibility, reliability. A future-proof design for your business

The advanced sensor technology to the BPS.

C6 is the best in its claim, and has been sieven open questionally for the needs of commenced bankward processing. The features of the all-in-new central visuale a high-resolution contact image sensor (CSI) for detecting consoluted, demonstration, confestions on the situation of the contact image sensor (CSI) for detecting consolute, demonstration, confestions on the situation of the contact integer sensor (CSI) for detecting consolute, demonstration, and Stores integer sensor integer sensor integer sensor integer sensor integer in the contact of the sensor integer i

The BPS C6's Bander Unit (BU) is a new and optional function that benefits cash center processes in several ways. Automated banding leads to significantly higher throughput, enabling the operator to process either the same number of banknotes in a shorter time or more banknotes in the given time. In addition, a higher level of automation leads to enhanced security

there efficiency is improved. The most frequently occurring denomination from the process of the

The BU comes with two studies numbing in transient and allowing blanking to contrase were if the first studies is not interested in the first studies in full first in a first significant interested in the first studies in tarfalms mode. As abon as a bashnote pathage is marked, if it authoristically special contained on pathogs in the studies into an optional container or notes in optional conveyed buttle full first instructions productively and performance.

The BU contains land not printing, provid-ing all important processing information automatically, which again contributes in the efficiency of the operator.

Delivering automatically bendied pockages of 100 banknotes (as dandard in the banknote (as dandard in the banknote indicity); the full can be interfaced to 165 % 65 year another and the externish module, and can be upgraded to existing machines, facilishing insurvoid productely, while excurring the artist in westment.

Creating Confidence

Giesecke+Devrient (G+D) is a global security technology group headquartered in Munich. As a trusted partner to customers with the highest demands, G+D secures the essential values of the world with its solutions. The company develops technology with passion and precision in four major playing fields: payment, connectivity, identities and digital infrastructures.

G+D was founded in 1852. In the fiscal year 2021, the company generated a turnover of 2.38 billion euros with around 11,800 employees. G+D is represented by 89 subsidiaries and joint ventures in 33 countries.

TECH FACTS

Nominal throughput: Up to 72,000 banknotes per hour

in all operating modes

Singling rate:

Up to 1,200 banknotes per

Feeder capacity: Up to 1,500 banknotes

- Reject stackers: 2 reject stackers or 1 reject stacker and 1 additional output stacker
- Large output stacker in basic Module: 4x 500 banknotes
- Extension modules: 4x 250 banknotes, 8x 250 banknotes

Currencies:

Up to 60 currencies

Fitness classes: ATM, FIT, UNFIT

Dimensions (H x W x D) BPS C6 (4-12 stackers): 680 x 860 x 425 mm -680 x 2110 x 425 mm

Weight basic system: approx. 86 kg

W x H x D (incl. reject pocket): 750 (885) x 558 x 425 mm

Weight (incl. reject pocket): approx. 113 (120) kg
